

PLANT ESTABLISHER

6-12-8 + IRON

GUARANTEED ANALYSIS

Total Nitrogen (N).....	6.0%
0.2% Urea Nitrogen	
2.2% W.I.N.	
0.7% S.A.W.S.N.	
2.5% Ammoniacal Nitrogen	
Available Phosphoric Acid (P ₂ O ₅).....	12.0%
Soluble Potash (K ₂ O).....	8.0%
Sulfur (S).....	2.7%
Iron (Fe).....	2.0%

INGREDIENTS: Milorganite*, Nutralene**, Ammoniated Phosphate, Sulfate of Potash, Gelscape***, and Hydro-Wet****.

DIRECTIONS

FLOWER BEDS: Use at a rate of 25 lbs./1000 sq. ft. and incorporate into the upper 4 to 6 inches of bed. For Northern United States beds, a single application will supply the necessary nutrients for season long growth. For Southern United States beds, a second application could be applied and raked into the bed 18 to 20 weeks after the initial application.

GREENS & TEES: Use at the rate of 25 lbs./1000 sq. ft. and incorporate in the upper 2 to 4 inches.

UNDER SOD: Use at the rate of 25 lbs./1000 sq. ft. Work into the seedbed when practical. For resodding collars, aerify before removing old sod. Take off old sod and apply plant establisher.

TREES: Use 1 ½ lbs. per 1” diameter. Mix in with back-fill.

GREENHOUSES: For bedding plants in greenhouses, use at rate of 25 to 50 lbs./cubic yard of soil mix.
