**Spring Valley®**
Moving beyond conventional... ...for a better planet

Natural Green® Pro-sorb™ – The Cornerstone of Innovation.

In close cooperation with the leading global supplier of technology-based systems for the paper and pulp industry, Spring Valley is proud to introduce a new generation of alternative industrial absorbent products to workplace environments. In the rapidly growing area of eco-friendly products, Natural Green® is a fresh, clean solution for those that need high quality products that can save them money.

Natural Green® Pro-sorb™ moves beyond conventional industrial absorbent products that simply provide adequate results at a reasonable cost. With Pro-Sorb™ Professional absorbent you can expand your customer base to include a new category of consumers - that want more than just industrial absorbent. With Pro-Sorb™ you can use less and save up to 40% more than most other absorbent materials. With Natural Green® you can feel secure in knowing that you are using high quality products that are better for you and the planet. Natural Green® gives you the peace of mind knowing that you are pledging your support to a healthier earth by using products that better manage our greenspaces.

About Spring Valley.
For over fifty years, Spring Valley has been dedicated to the strategy of implementing the best aspects of developing products for the Agricultural and Professional Green Industry. Headquartered in Jackson, WI, we are committed to developing innovative products that provide solutions to a wide audience in agriculture, lawn and garden, and retail markets. Spring Valley has state-of-the-art transport, mixing, screening, and packaging facilities in Jackson, WI and Fostoria, OH that provide an effective market range that includes the entire U.S. as well as distribution channels throughout North America, Europe, and Asia.

Why use Natural Green™ Pro-sorb™?
Pro-sorb™ all purpose industrial absorbent is clean, effective, and completely environmentally responsible. Pro-sorb™ absorbent is made from 100% recycled post-consumer paper waste. It absorbs oils, solvents, lubricants, coolants, water, and most non-aggressive liquids on contact. Because Pro-sorb™ absorbent is created using a paper manufacturing by-product, it's easy on the environment and can be used on almost all types of spills and clean ups.

It’s clean
Pro-sorb™ granular absorbent is dust free and cleans up easily. It leaves no stains and is non-abrasive. What’s more, it can be incinerated and leaves a very low ash content. It’s density keeps it from being blown away by wind or air movement making it clean up easier and faster.

It’s safe
Pro-sorb™ loose granular absorbent can be used on most types of spills and industrial clean ups. It contains no crystalline silica – which means no exposure to employees, end users, or the environment. Industrial absorbents that contain clays (silicates) or diatomaceous earth (amorphous silica) may represent a health hazard.

It’s effective
Pro-sorb™ granular absorbent retains the liquids it absorbs and holds it in place until clean up is complete. It is non-abrasive, non-scouring, wind resistant, and safe for use on floors and all other work surfaces.

It’s highly absorbent
Pro-sorb™ loose granular absorbent soaks up spills fast and continues to work even better when allowed to absorb in place for just a few minutes. It can be used on oils, solvents, coolants, solutions, lubricants, and most types of non-aggressive liquids.

It’s environmentally responsible
Pro-sorb™ absorbent has a weight-to-absorbency of one-to-one (1:1). 30 pounds of Pro-sorb™ granular absorbent will absorb 30 pounds of oil. This is equivalent to about four gallons of oil.

“It’s highly absorbent
Pro-sorb™ loose granular absorbent soaks up spills fast and continues to work even better when allowed to absorb in place for just a few minutes. It can be used on oils, solvents, coolants, solutions, lubricants, and most types of non-aggressive liquids.

“It’s environmentally responsible
Pro-sorb™ universal absorbent is made from EPA certified inert materials. It contains no crystalline silica or other hazardous components – minimizing exposure to people and environment alike. It is also biodegradable and returns to elements naturally occurring in the earth. The patented manufacturing processes used by Natural Green™ to make Pro-sorb™ absorbent keeps thousands of tons of industrial waste materials out of local landfills every year. Pro-sorb™ absorbent is the loose granular absorbent with a difference. It delivers the performance you want plus the level of safety and environmental protection you need.

If you are looking for a clean, effective, environmentally responsible, and readily available universal granular absorbent – choose Pro-sorb™ absorbent.
Pro-sorb™ Absorbent is available in 2 convenient sizes:

**Easy to use Instructions:**

Unlike conventional absorbents, Pro-sorb™ is made from post-consumer waste—a renewable resource that’s earth-friendly, highly absorbent, virtually dust-free, and safe for disposal by incineration. Pro-sorb™ is the absorbent with a difference; it delivers the performance you want plus the level of safety and environmental protection you need.

**Typical product applications:**

Use on industrial liquid spills of most kinds, use on all oils, coolants, solvents, lubricants, and non-aggressive liquids.

**Directions for use:**

Pour a liberal amount of Pro-sorb™ absorbent on any liquid spill and wait a few minutes, then sweep up the product and dispose of it in accordance with local and state laws.

**Storage & Handling Information:**

For best results and maximum absorbancy store Pro-Sorb™ in a dry location.

Pro-sorb™ is made from 100% recycled paper.
